Practice of Kriya Yoga is independent of age, physical health, socio-cultural or religious background, and integrates into any other spiritual practice. – Initiation means to receive one's initial or deepening experiences with a practice in a safe and sacred setting from a teacher initiated in the lineage authorised to guide others in them. – Those powerful Tools with profound effect are given in person, specifically to you, and *only* for your own private use on yourself. – Your Ability to use them requires your initial training and your regular personal practice. Then you can and will experience the sacred magic of inner alchemy which words cannot describe.
